STATEMENT

Safety data sheets are a communication tool within the supply chain of *substances* and *preparations*. They are required by the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) developed by the United Nations Economic Commission for Europe (UNECE).

Our Safety Data Sheets are in compliance with the REACH Regulation (EC) No 1907/2006, which takes into account the rules for safety data sheets of the Global Harmonised System (GHS).

Produits Dentaires SA provides Safety Data Sheets for its *substances* and *preparations* exclusively, as requested by international regulations (see below for the definition of substances and preparations). No SDS is issued for the products of our portfolio that do not fall within one of these categories because – unlike chemicals – they have no potential for adverse effects to people or the environment, and because no regulation requires SDS for such products.

Substance: means a chemical element and its compounds in the natural state or obtained by any manufacturing process, including any additive necessary to preserve its stability and any impurity deriving from the process used, but excluding any solvent which may be separated without affecting the stability of the substance or changing its composition;

Preparation: means a mixture or solution composed of two or more substances;
